Revenue

The revenue for the Quarter ending 30 June 2024 amounts to R 878 million and the year to date actual revenue amounts to R 4,038 billion and reflects unfavourable outcome of 1% when compared with the year-to date budget of R 4,093 billion.

The unfavourable outcome on the year to date can be attributed to the following:

- **Property Rates (-6%):** The property rates revenue was adjusted downwards with the adjustment budget to bring it in alignment with the current trend. However, the anticipated revenue has not yet been reached. The reconciliation between the valuation roll and the financial system is conducted on a monthly basis. Finance Department and Housing Development Department have devised a plan to fast track the correction of properties that are incorrectly zoned. This should improve the revenue on properties.
- **Service charges – Electricity revenue (-9%):** Less revenue billed on electricity than initially anticipated. The reduction on this line item can be attributed to illegal connections and customers converting to solar. The municipality has appointed a service provider who will be installing Anti tempering meters in the households in order to reduce illegal connections. The work is expected to commence in July 2024. The budget on this line item was reduced during the Adjustment Budget.
- **Service charges – Refuse revenue (-10%):** Less revenue billed as the anticipated increase on the refuse revenue has not materialised. Process of reconciling the valuation roll and the financial system on an ongoing basis to ensure that all properties within City of Matlosana are correctly billed for refuse collection.

- **Interest earned from receivables (19%) more:** The variance is as a result of the debtors' book that is increasing due to non-payment of debtors. The increase in the debtors result in an increase interest charges.

The negative revenue is also affected by the following factors:

- The revenue enhancement strategies as reflected in the budget funding plan has not yet been fully realised the anticipated revenue;
- High illegal connections. Implementation of Smart Metering Programme will address this problem. The municipality has also started the anti-tempering project to curb the electricity distribution loss and improve revenue.
- Debtors' book that is increasing due to non-payment of debtors. The municipality has identified top 200 accounts amounting to R 413, 2 million to be collected over the period of three months, in addition to normal monthly collection.

Expenditure

The operating expenditure for the quarter ending 30 June 2024 amounts to R 1,498 billion and the year to date actual expenditure amounts to R 3,822 billion and reflects a negative deviation of 20% when compared with the year to date budget amount of R 4,750 billion. The negative deviation is because of cash flow challenges. Spending on most of the items is directly linked with cash flow.

The variance on the expenditure against the YTD budget is mainly on the following items:

- **Interest (-92%):** The underspending is due to the reduction in capital portion on loan repayment which reduces the finance costs, and also the municipality has not taken any new loan. The interest on overdue accounts mainly on Eskom and Midvaal accounts also plays part on the underspending. Journals and closing entries are still being processed to adequately account for all the financial transactions, which were incurred for the year ended 30 June 2024.
- **Bulk Purchases:** Expenditure is lower due to the outstanding Eskom invoices; it is difficult for the municipality to meet the obligation due to the cash flow challenges.
- **Inventory consumed:** Inventory consumed includes Bulk Water, expenditure is lower due to the outstanding Midvaal invoices, and the Municipality is struggling to meet the obligation due to cash flow challenges.
- **Contracted services (-36%):** Mainly on Security service, repair and maintenance of fleet, repair and maintenance of buildings and equipment and Asset Register administration. Low spending than initially planned due to cash flow challenges.
- **Debt Impairment (-100%):** Transactions for debt impairment have been done on the wrong Vote number. Journals will be done at year-end to correct the mistakes.
- **Operational cost (-31%):** less spending due to cash flow challenges.

The following measures have been put in place in terms of unnecessary expenditure and Credit control.

- Strict monitoring in terms of spending of non-essential items, which led to savings on other expenditure line items.
- The electrical department has been assisting with credit control from 1 April 2024, there are challenges with transport and credit control section has intensified on calling clients. There were 192 disconnections carried out.
- The water department has not assisted in any credit control actions as they have indicated they lack capacity, they however assisted in unrestricting the clients that were previously restricted, that have paid.

The payment rate should be accelerated, as the financial stability of the municipality is dependent on them.

Progress in terms of Financial Plan

The revenue enhancement strategies as reflected in the Financial Plan has not yet been fully implemented and realised the anticipated revenue. The Municipality must on a monthly basis, consider the status with regards to the implementation of the Financial Plan.

TABLE: 18 MATERIAL VARIANCES

NW403 City of Matlosana - Supporting Table SC1 Material variance explanations – M12 June 2024					
Ref	Description	Variance	%	Reasons for material deviations	Remedial or corrective steps/remarks
1	Revenue By Source				
	Property Rates	(38 570 720)	-7%	The property rates revenue was adjusted downwards with the adjustment budget to bring it in alignment with the current trend. However, the anticipated revenue has not yet been reached	The reconciliation between the valuation roll and the financial system is conducted on a monthly basis. Finance Department and Housing Development Department have devised a plan to fast track the correction of properties that are incorrectly zoned. This should improve the revenue on properties.
	Service Charges: Electricity	(98 850 755)	-9%	Less revenue billed on electricity than initially anticipated. The reduction on this line item can be attributed to illegal connections and customers converting to solar.	The municipality has appointed a service provider who will be installing Anti tempering meters in the households in order to reduce illegal connections. The work is expected to commence in July 2024. The budget on this line item was reduced during the Adjustment Budget.
	Service Charges: Refuse	(22 797 811)	-10%	Less revenue billed as the anticipated increase on the refuse revenue has not materialised.	The municipality has to ensure that the process of reconciling the valuation roll and the financial system is accelerated to ensure that all properties within City of Matlosana are billed for refuse collection.
	Interest earned from Receivables	96 520 958	19%	The variance is as a result of the debtors' book that is increasing due to non-payment of debtors. The increase in the debtors result in an increase interest charges.	The enhancement of revenue and increasing of payment rate should be accelerated, as the financial stability of the municipality is dependent on them.

2	Expenditure by Type						
	Contracted services	(168 069 725)	-36%		Mainly on Security service, repair and maintenance of fleet, repair and maintenance of buildings and equipment and Asset Register administration. Low spending than initially planned due to cash flow challenges.		
	Interest	(9 863 376)	-92%		The underspending is due to the reduction in capital portion on loan repayment, which reduces the finance costs, and the municipality has not taken any new loan. The interest on overdue accounts mainly on Eskom and Midvaal accounts also plays part on the underspending.	Journals and closing entries are still being processed to adequately account for all the financial transactions, which were incurred for the year ended 30 June 2024.	
	Debt Impairment	(1 062 420 572)	-100%		Transactions for debt impairment have been done on the wrong Vote number. Journals will be done at year-end to correct the mistakes.	Journals have to be done to correct the mistakes.	
	Operational Cost	(95 248 344)	-31%		Less spending due to cash flow challenges		
	Bulk Purchases	(430 340 024)			Expenditure is lower due to the outstanding Eskom invoices; it is difficult for the municipality to meet the obligation due to the cash flow challenges.		
	Inventory consumed	(170 538 670)			Inventory consumed includes Bulk Water, expenditure is lower due to the outstanding Midvaal invoices, and the Municipality is struggling to meet the obligation due to cash flow challenges.		
	Depreciation	(103 914 684)	-25%
